

# OIL AND GAS

Engineering – Machining – Welding – Installation

## Complete solutions for the industrial world

# WHO WE ARE

HMR Group consists of nine companies, located strategically along the western coast of Norway, with its headquarters in Husnes, Hordaland.

For well over 50 years, HMR Group has been a partner and solution provider for the international industry. HMR is a preferred supplier for, among others, energy, process, infrastructure, and the oil and gas industries. The core business has been developed in Norway, but HMR is now an international holding with many referrals around the world.

Our extensive expertise has been built up across HMR's business sectors, which have resulted in several operational synergies. We have developed a flexible and solution-oriented professional environment where our staff works in interdisciplinary teams, focused on comprehensive solutions.

All manufacturing companies in the HMR Group are certified according to ISO 9001:2008 and are qualified in the various supplier databases.

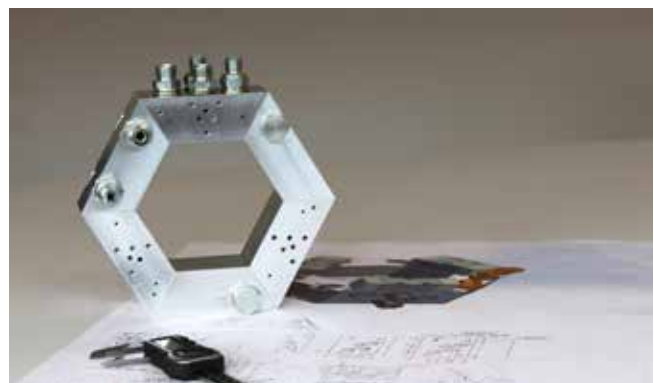

# PRODUCTS FOR THE OIL AND GAS SECTOR

Engineering – machining – welding – surface treatment - installation - spare parts

HMR has extensive experience in the oil and gas sector nationally, with strong ties to the major market players. HMR offers services in the following areas:

- Fabrication, installation and overhaul of mechanical and welded steel structures
- Design, installation and commissioning of hydraulic systems
- Engineering, machining and installation of high-tech components
- Automation, mechatronics, robot control

HMR has four workshops, two of them with the deep-water quays; thus, we offer the option of transporting large structures to and from our factories by ship.

# RESOURCES FOR THE OIL AND GAS INDUSTRY

**Our skilled employees are our most valuable resource.**

With approximately 240 employees in Norway, HMR offers a flexible capacity, easily adjustable for time-sensitive projects. The companies in the group work together in a network that provides the best possible utilisation of expertise, manpower, equipment and premises.

Human resources for the oil and gas industry are as follows:

- Project management and control staff
- Engineering staff with expertise in:
  - Mechanical, hydraulic and control technology
  - Automation, machining, mechatronics, robot control and sensor technology
- International Welding Inspector IWI-S
- International Welding Coordinator IWS
- Large network of national and international suppliers
- Mechanics with high expertise in hydraulic/pneumatic/mechanical installations
- Skilled machine workers for CNC & machining centres
- Certified welders and metal workers
- Painters

# REFERENCES

## Some of our current projects

We are proud that several regular customers choose to rely on our ability to satisfy their needs and expectations. We appreciate their selection of us to be a part of their supplier network.

Please find here a list of some of our projects in the oil and gas sector in the last three years:

- Frames to davits with DNV's follow up
- Davit prototypes with DNV's follow up
- Boat cradles for offshore lifeboats in accordance with the standard for Certification No. 2.7-3, with DNV's follow up
- HPU foundations to offshore in accordance with NORSOK and other international requirements
- Assembly and welding of various stainless steel components according to NORSOK
- Assembly and welding of super duplex pipe bends.
- Assignment project, engineering of NUI firefighting containers DNV 2.7-1
- ROV operated equipment for subsea
- Machine for testing seismology cables
- High tech pipeline inspection tools - both internal and external inspection
- Product development - HMV Pulley (Vossablokka)

# HSE AND QA

Health and safety are core values at HMR, and we honour them.

We will not only strive to meet the intention of the law, but also have a proactive attitude to achieve continuous improvement of the results.

All accidents can be prevented.

We believe that high standards of health and safety will help to strengthen our results and that our health and safety policy is strictly linked with the quality of the services we provide.

Environmental protection and waste reduction are integral parts of the group's business strategy. By fulfilling our environmental responsibilities, we are increasing our ability to deliver competitive and profitable products and services.

We will continuously increase awareness and understanding of the company's HSE and QA policy, and its consequences for all those working for and on behalf of the company.
